Here is a relatively new plan based or one side of an old issue. Governmental reorganization in Columbus or in Washington will be disappointing if too much is expected of it. A state ad ministrator might be a great improvement the state won't be able to arrive at a con clusion however because many Ohioans aware of the scarcity of good administrators in private husingse model for the proposal will wonder where the state could find the right man. Where for that matter could enough to let the right man run the state without political interference?

Its not hard to understand why the action committee sent its proposal to the g vernor with only one signature attached

Four years ago his outward appearance of confidence was an oratorl at gesture. Only his into mates knew it but his knees were a little shake. In the last election all who have had personal dealings within the White House seem sgreed that a change is noticeable. They call it extreme confidence self-assirtance less patience personal will power more strength and many other things. They note it in the way he speaks the things to does. For example, they agree that at no time during the four jears preceding Nov. 3 would he had event to Congress such a self-willed temparatization program as villed teorganization program a

They expect the country to see a little different side of a different Reosevelt during the next four

The foir years seem to have sharpened his likes and dislikes for people. The desire of the President to expand his trusty circle is seen by hind his metusion of his on Jimmy to his secretariat and his recommendation that eix more ad ministrative assistants be author Son Jumes is being mentioned as a presidential contact mun with congress but he will not be that.

Friends of course expect him to carry on the Poosevelt tradition in Ame ican politics, and will not be surprised if they see him a United States senator some distant day.
